Babila demonstrates that, when it comes to a design, the material can be as important as the shape. This outdoor wall sconce is of polished stainless steel, a circular object that produces a panoramic effect, reflecting its surroundings. It is not

designed to be an architectural element, but rather a simple and beautiful design that draws attention, whether on or off, as it allows us to catch a glimpse of the daily life occurring around it.

The Bicoca is born with the optimism of brightening life and accompanying the good times, wherever you go. This colorful, lightweight portable lamp projects an intimate light that adds warmth to all your personal spaces.

Made of polycarbonate, Bicoca begins with an overlay of basic geometric figures, with a tiltable shade to direct the light. Three separate accessories increase the applicability and versatility of the lamp.

At first glance, the Bohemia appears to be made of blown glass. In fact, however, the lamp's large size ruled out that material. Instead, the designer settled on polycarbonate to create an exciting, organic, translucent profile that integrates two

volumes into a single shape. The design allows for a large shade in different colors that does not interfere with the white interior.

Bolita, kaschkasch

The Bolita lamp beckons you to touch it to adjust it. Its structure is as simple as it is magical: a rounded surface that houses an LED located on a central axis, and an overlapping glass sphere that when moved, creates an eclipse effect.

Moving the Bolita dims or boosts the light, an interplay that captivates with its beautiful visual effect.

The beauty exuded by the Cala stems from its simple, synthetic and essential form: a shade that embraces the light without containing it, letting it escape to yield very warm lighting.

Its structure has always been made of wood, it's also available in a black lacquered metal. An iconic Marset design defined by that most valuable pairing: form and function.

Its design evokes a garage lamp, but a high quality one, lighter and eminently useful, with three setting for illumination. It is sophisticated and conveys a warm light, decidedly designed to serve as an accompaniment. Its structure is protected by a

grate that revolves the light source, a touch rendering it truly original. It also comes with an accessory that allows one to hang it.

Cluster, Accessory

The cluster gives you absolute freedom to design the light you desire. With it, you can illuminate large spaces and create different compositions.

Take into account the total power in watts, the power of the driver, and the wire entry points of the canopy. The total wattage of the selected lamps cannot exceed the max wattage of the canopy's driver. Therefore, you must choose your canopy/driver by the power required. Finally, the number of lamps installed in a single canopy cannot exceed the number of wire entry points of that canopy. Customize your space with our Dipping Light cluster configurator at configurator.marset.com/dipping-light

This collection consists of a table and floor lamp, as well as a separate torchier-style floor lamp, all of which use mixed materials of different densities, such as aluminum and steel, to create a unique counterweight system.

This structure affords great precision when moving the lamp, reaching different heights and distances to adjust the position and direction of the light beam.

Weight: Net 4,8 kg – Gross 6,8 kg
Package: 165 x 24 x 17 cm – 4,1 kg Vol – 0,067 m³
 36 x 36 x 3 cm – 2,7 kg Vol – 0,004 m³
LED included

Cable length: 2 m
Wire installation: Plug-in
Color cord: Black
Switch location: Tilttable diffuser

Dipping Light, Jordi Canudas

Beyond its function as a lamp, the Dipping Light seeks to excite. When it's turned on, its different shades of paint sift the light, creating a magical ambient effect. When it's off, its colored glass sphere is an object charged with beauty, and eye-

catching design piece for a shelf, bedside, or table. The various layers of paint draw concentric circles and capture the light, moderating its intensity. The paint becomes the shade, colouring and texturizing the light.

Materials
Discs: ABS
Semi-sphere: Chromed metal

Product type: Wall
Light source: 2x E14 LED 5W
Weight: Net 1,2 kg – Gross 1,5 kg
Package: 59 x 19 x 15 cm - 1,5 kg – VOL - 0,02 m³

Wire installation: Hardwired

Djembé, Joan Gaspar

Using a rotomolding technique allowed the designer, Joan Gaspar, to design a fixture with vastly different interiors and exteriors: its outside recalls the texture of a stone, giving off a perception of great weight, emphasized by its volume. In the

spacious interior you'll find a smooth, white space perfect for the reflection of light. Djembé is a lamp designed for use in public spaces that seeks to bring beauty and an unbeatable quality of light.

Fragile, Jaume Ram rez

Fascinated by timeless design, designer Jaume Ram rez is interested in the archetypal table lamp in which a lampshade distributes light in all directions. This is the starting point from which he reflects and experiments to propose a new

glass design, with more streamlined shapes. The Fragile lamp is a mix of geometric shapes. A cone and a sphere are arranged to hold a cylinder that emits ambient light from below.

Drawing thin beams of light in a space with each one of them pointing in any direction. This is why we have created Fris, a multi-purpose lighting system, available in a wall/ceiling or pendant version, which allows you to combine several units in different sizes and positions, each one aiming its own beam of light. What makes it

unique is that the glass not only protects the light, but also provides a mechanical function, suspending the whole system and allowing the lamp to rotate and the light to be steered in a certain direction. There is also a more technical Pro version where the light is distributed in cells with independent lenses, achieving a UGR of under 19.

Funiculí, Lluís Porqueras

Funiculí is a reedition of a lamp designed in 1979. Lluís Porqueras has always sought an absolute simplicity in his designs, doing away with everything superfluous to leave the essence of the useful, simple object.

Using the same double-clip mechanism of the original, this scaled-down model allows easy height adjustment and 360° shade rotation to fit the needs of any room or user.

The Ginger collection is notable for its great simplicity of form, its lightweight appearance and reflected direct light. A design for any type of project.

Available in two very different materials, wood or metal, it provides a warm glow with no glare, illuminating just the areas that need it.

The Ginger collection is moving outdoors, with wall sconces that can be installed individually or in a cluster, a 15 cm sconce – perfect for passageways and small outdoor areas –, a lamppost, small floor lamps and a wall version with an arm.

The Ginger outdoor also features a unique rust finish, with a deep, warm glow, alongside the standard black-white metal finish of the indoor version.

High Line, Josep Lluís Xuclà

Visually, the High Line is a light sculpture, a svelte line that gives off light without revealing its source. This floor lamp by Josep Lluís Xuclà generates light indirectly by reflection, and uniquely, the light does not bounce off the ceiling, but off the wall.

Its designer is interested in having the wall return the emitted light. A wall is this lamp's greatest ally, and they want to remain close. Formally, it's a composition in volumes and colors.

Switch location: In-line

In search of the beauty of light, she created a sculptural lamp defined by its pure, almost graphic forms, and by the balance between rigidity and fragility.

In an effort to offer ambient light for any classic or contemporary interior design project, this collection can be used to create light compositions.

Konoha is a simple, discreet wall lamp with a shade over a directed spotlight that turns through 360°. The shade, like a hat, covers the spotlight, allowing the light to be directed upwards, bounce off the inside and project a beam of soft light, creating

warm ambient lighting. If instead the spotlight is focused downwards, it projects a beam of direct light, turning the fixture into a reading lamp.

Ledtube, Daniel López

Its ergonomic design beckons you to move it in any direction, up to 360º, and its use is very intuitive. When opened, it turns on automatically; when closed, it turns off and hides away in the wall, like camouflage. It's so versatile it can be installed

vertically or horizontally, adapting to the needs of your space. Also Ledtube features a honeycomb grill that traps peripheral light in all directions, avoiding glare.

Rational and minimalist, this wall lamp is the result of a technical, functional and ornament-free design. Inside, a polycarbonate film surrounds the light source to provide high-quality diffusion.

Designed to illuminate kitchens and bathrooms, it has an IP44 rating. Its shape allows it to be installed both vertically and horizontally.

Maranga is the name of an imaginary fruit: exquisite, tempting, succulent. It reinterprets Scandinavian style in the essentiality of its shape and its rational use of lighting to generate a warm, comfortable atmosphere.

This interplay of light and dark generates an effect which is rich in shades of light and prevents glare, while an opening at the bottom fitted with a diffuser gives out direct light downwards.

Diffuser: Transparent polycarbonate

Product type: Ceiling
Light source: 3x E27 LED Standard 8W
Weight: Net 2,2 kg – Gross 3,8 kg
Package: 60 x 60 x 24 cm – 3,8 kg Vol – 0,09 m³

Wire installation: Hardwired

The beauty of the Mercer stems not only from its essential shape, but also from how its materials blend together. The transparent blown glass structure surrounds the textile shade, which seems to float, conveying a sense of airiness and sophistication.

An almost imperceptible lens covers the LED and distributes the light. If only the cylindrical lamp is used, the downward-directed light is impeccable, and when a

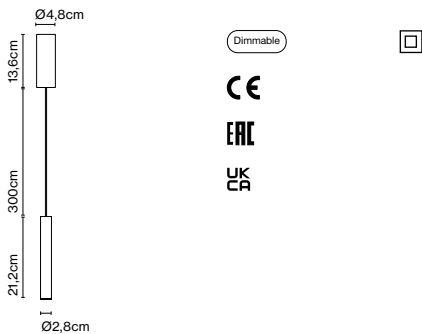

shade is added, the light escapes, illuminating the lamp itself. Now also available with a pressed glass accessory, in a smoked finish. A feature that adds volume and nuance to your lighting.

The MVV story begins in the 1970s. This new suspension lamp is a first, and was designed by Manuel Valls Vergés, one of Spain's most notable architects at the time and partner of Jose Antonio Coderch for 15 years, alongside whom he undertook

such prominent projects as the Ugalde house, near Barcelona. The MVV name reflects Vergés' initials, as a way of displaying his authorship of this unique lamp.

N°8, Christophe Mathieu

The wooden sphere of the N° 8's lampshade is handcrafted to make each lamp unique. Its smooth texture has the quality and feel of a billiard ball, while its flexible arm, covered in braided fabric, is a mainstay that improves its look without sacrificing

its efficacy. The N°8 was designed to be placed at the head of a bed and add comfort to the bedroom, a place dedicated to restfulness, where a good book is always healthier than a sleeping pill.

For Christophe Mathieu, the design process consists first and foremost of observing and creating an object with wide-ranging possibilities that will be timeless in its use. That was his thinking behind this new bollard lamp and wall fixture, which can use its

light to accentuate the outdoors, reveal architectural details, light a path or spotlight a tree. In every version of the bollards, the spotlight can be placed at the chosen height along the stem to adapt to the growth of surrounding vegetation.

A good design is one that lasts over time. This is the case with the Plaff-on!, a lamp that has been illuminating ceilings and walls for almost ten years. This very functional collection has been updated with versions in two sizes of 33 and 50 cm in diameter including IP protection grade, a bollard model and an outdoor wall version with perpendicular orientation and a new finishing in rust brown.

The idea behind the Pleat Box is a sophisticated combination between a digitally designed crease in a piece of cloth and a silhouette that is applied to a ceramic base.

The Pleat Box collection is available with an integrated LED technology, which projects indirect light and prevents glare.

The fluidity of its movements and its integrated LED technology makes the Polo a light source with a great precision and versatility.

The Polo comes with a diffuser made from injected aluminium and a rotary switch located in the upper part.

Compact indoor and outdoor wall lamp with a pressed glass diffuser. Its undulating shade covers the light, blurring it. It doesn't settle for just providing light, it also manages to create an ambiance.

Roc tempts the senses. It looks like a bright block of ice, and its irregular, almost organic texture beckons to be touched.

Roc IP65

Inspired by the lanterns found on fishing boats, this collection of outdoor customizable lamps allows you to create multiple compositions. Users can choose how many shades to place on the diffuser, along with their order, position and

direction. This interplay of combinations yields a rich array of direct or reflected light. The Santorini collection can be hung from the ceiling, either individually or clustered together, or they can be strung up like a garland.

Wood and metal combine in a design that utilizes the beauty and simplicity of basic geometric shapes. The Scantling is based on a highly functional and flexible system, in which all the movements of the fully rotational shade use ball joints and arms to

create a versatile, easy-to-move light. In addition, its technical precision requires no exposed springs or counterweights to stay in the specified position.

Free of cables, lightweight, with a simple structure and neutral colours, this design becomes a discreet part of the table, without formal or chromatic excesses. An

object simplified to the max that allows easy placement and mobility and ensures good lighting in restaurants, bars, cocktail bars, terraces and patios.

10 hours in half power
20 hours in a quarter power

The Soho makes a statement in recognition of those lamps that were traditionally used to light up markets, taverns and cafeterias.

It is made from rotation-molded polyethylene, a technique that allows us to offer it in different sizes.

Sun, Yonoh

The concept of Sun is inspired by the early hours dawn, when the light of the sun plays along the horizon as it begins to appear. The Yonoh Studio played with superimposing materials to achieve this effect, creating a light with a luminous glow

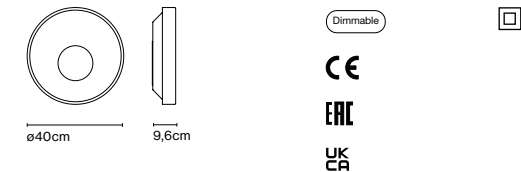

that is capable of transporting us to that precise moment. The light that emanates from Sun creates a very special atmosphere, capturing our eyes and soothing our souls.

Tam Tam, Fabien Dumas

Imaginative and playful, Tam Tam is dynamic in its configuration and expressive in its colours. The extensive collection, which comes in pendant, wall and floor lamps, has harnessed colour since its inception to create volume and accentuate spaces.

A decade later, the collection is getting an update to offer new possibilities. The glossy finishes have become semi-matte and new, softer colours have been added to harmonise the whole.

The W, PerezOchando

Unfold the light or fold it. The design of Estudio Perez Ochando proposes a lamp of large format, flexible, thought to adapt to the different necessities of lighting big spaces.

A large black vertical structure is the main shaft from which a number of rods emerge; some can be moved upwards to expand the light and others downwards to focus it.

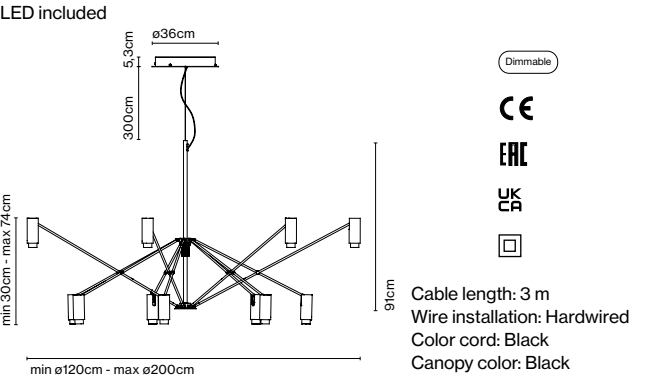

The W

From light to shadow with a single gesture. Theia has two faces: to discover them, simply swivel the fixture around its central axis. It can be pointed towards you for use as a reading lamp, or towards an object or a wall, creating a subtle, indirect light that immediately warms the atmosphere.

Symbols & Certificates

IP65

Electric fittings are preset in order to prevent the intrusion and contact with solids and liquids with live parts. Resistance against the penetration of solids and liquids is expressed by the initials IP, followed by two digits that stand for the degree of protection: the first referring to solids, the second to liquids.

Very low safety supply voltage; not to be used at over 12V (at 50Hz). Earthing: excluded.

All products are manufactured according to the set safety and electromagnetism standards of Europe: EN 60598-1, EN 60598-2-1 and marked CE.

Product complying with TR TC 004/2011 and TP TC 020/2011. Custom Union Regulation.

Product complying with UK Conformity Assessment.

Dimmer on the unit.

Product which can be dimmed.

Product with an additional protection cable (grounds).

Basic insulation plus second insulation or both replaced by reinforced insulation. Earthing: excluded.

★

Available until depletion of stocks.
Check with us before placing an order.

Prices

Recommended retail price list, excluding VAT.

The valid price list shall be that included in the latest version of the official published Price List. Marset reserves the right to make a price update upon 30 days' notice.

Orders and invoices

Minimum order of €120 net. For orders below this amount, the invoice will include a charge of €15 for handling, administration and collection costs. Orders must be sent by e-mail. The orders will be considered as firm and having the product, availability, quantities, price, form and term of payment and transport conditions mentioned on the Order Confirmation Sheet, if the customer does not express their disagreement within 24 hours of the sending of the same.

The terms of payment, such as deadlines, payment methods, penalties and any other relevant details, shall be set forth and previously agreed with every client.

The due date fixed on the invoice is irrevocable. In case of delay, the corresponding financial and administrative charges shall be applied. The existence of a commercial claim shall not modify the postponement of the due date of the invoice, unless expressly authorised by Marset.

The products to be sold shall remain the property of Marset Iluminación S.A. (Marset) until the corresponding invoice is paid in full. This condition shall also apply in the event of termination of the activity by the purchaser.

Transport

In mainland Spain, carriage shall be paid for orders with a net value of more than €500. For shipments below this amount, the invoice will include a charge of €20 for shipping and handling.

For transport to other EU markets, the mode of transport and the conditions for the application of carriage paid (Annex B) shall be determined according to the territory of destination.

For carriage paid orders, Marset reserves the right to select the most appropriate transport agency according to the circumstances and particular characteristics of each shipment.

For shipments to the Canary Islands and non-EU export markets, the conditions of carriage shall be Ex Works.

For orders with postage due by the customer, Marset will ship through the transport agency selected and indicated by the customer.

Marset's priority is to deliver orders according to the agreed delivery dates. The dates communicated by Marset in the Order Confirmation are an estimate of when the order will be ready for shipment. Marset shall not be liable or in breach of its obligations to the customer for any delay in delivery, provided that Marset use commercially reasonable efforts to meet such dates.

Transport incidents

In the event of damage in transit, it is an essential condition that a claim be made within 24 hours of receipt of the goods, communicating it in writing to both the carrier and Marset, recording the incident on the delivery note if the damage is visible.

In the event of incident or breakage, Marset reserves the right to provide the most appropriate solution according to the circumstances and particular characteristics of each shipment.

Warranty

Our products are guaranteed for three years from the date of purchase by the distributor. Each product includes a code with the date of manufacture. Should said code be removed, the product will lose all warranty eligibility.

Our liability in case of warranty is limited to repair or replacement of the product, excluding screens, bulbs, charging cable and batteries.

The warranty does not include transport costs or the costs of installing and uninstalling the product, if applicable.

Repairs

In the event of request for repair of a product, a quotation must be accepted, which will be prepared once the product has been received and analysed at the factory. Shipping costs are always at the customer's expense.

Refunds

No refunds are allowed without the express authorisation of Marset with a document number as proof.

If the refund is accepted, the amount to be paid shall be a maximum of 80% of the invoiced amount.

Returns must be sent in their original packaging, in perfect condition and with the authorisation reference printed. Otherwise, our warehouse will not be able to accept the goods.

Other

Marset reserves the right to introduce as many modifications as it deems appropriate in its articles in order to improve their characteristics, without prior notice.

By placing an order, you accept our General Terms and Conditions of Sale.

In case of litigation, both parties shall submit to the jurisdiction of the courts of Barcelona.
